Adventure Works Group

Adventure Works Group · FY2027 month 7 of 12 (closed Oct 2026) · CAD

Fiscal year: All | Month: All | Period: YTD | QTD | MTD | Currency: CAD

Who we are

Designs and sells performance bicycles, components and riding apparel through dealers and its own online store. Canadian parent: reports in CAD, fiscal year 1 April to 31 March (FY2027 ends 31 March 2027).

Three years in brief

FY2025 North American core: five US divisions and Canada.
FY2026 European entry: France (50%) and Germany (25%) joined in April 2025, after the budget was set. An ERP migration in August 2025 left 3% of postings without a department.
FY2027 Pacific entry: an Australian joint venture (37.5% group interest) began trading in April 2026, again outside the budget. A new Software Subscriptions account opened as cloud tools replaced professional services; September 2026 was the first ledger exported from ERP v2.

The CFO's four questions

1 **Is growth organic or bought?** Executive Summary
2 **Is cost growth eating the upside?** Income Statement
3 **Where will the year land?** Budget vs Actual
4 **Is the balance sheet funding growth?** Balance Sheet & Cash

Fictional company built on Microsoft's AdventureWorksDW sample (MIT licence), re-dated; FY2026-FY2028 budgets generated by a documented script.

Data Quality & About

Data quality · 34 ledger files loaded · balance-sheet difference 0

Fiscal year: All | Month: All | Period: YTD | QTD | MTD | Currency: CAD

34	30	30	1	0	0	0	75.6%
Ledger files loaded	Duplicate rows removed	Blank depts fixed	Files with schema drift	Balance-sheet difference	Rows missing an FX rate	Accounts not in chart	Synthetic budget rows

What the data generator deliberately broke (reconcile with the counts above)

Month	Issue injected	Rows	How the model handles it
2025-06	Exact duplicate rows	15	Power Query removes exact duplicates
2025-08	Missing DepartmentKey	30	Mapped to department 0 "Unassigned"; flagged on the data-quality page
2026-01	Exact duplicate rows	15	Power Query removes exact duplicates
2026-	New GL account	355	Added to chart of accounts and report-line map; totals

What the exploratory analysis found (docs/eda/eda_report.md)

Distribution Monthly group revenue is close to normal (Shapiro-Wilk p = 0.52); individual ledger lines are heavily right-skewed, so outliers are flagged with robust median/MAD z-scores, not mean and standard deviation.

Correlation Revenue and cost of sales move almost one-for-one (Spearman 0.94); operating expenses less so (0.66). Margin is therefore decided below gross profit.

Integrity Every injected issue was detected: 30 of 30 duplicates, 30 of 30 blank departments, 1 of 1 schema-drift file. The balance sheet balances in every month.

Benford First-digit distribution conforms (Nigrini MAD 0.0068, acceptable).

Assumptions: fiscal year April-March; P&L at monthly average rates, balance sheet at month-end rates, budget at the prior fiscal year's average rate (Bank of Canada). Adding a monthly file to data/actuals and refreshing moves the whole pack forward one month.

Every source file, profiled on each refresh
